

# Weekly Coal Production

Energy Information Administration  
Washington, D C

**Contains Supplementary Data**

Production for Week Ended:  
April 12, 1986

## Preface

### The WCP

The *Weekly Coal Production* (WCP) provides weekly production estimates of U.S. coal by state, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1984*, and *Coal Data: A Reference*.

This publication was prepared under the direction of Robert Harris, Chief, Data Systems Branch, by Judith Wood. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202/252-8800).*

## Highlights

U.S. coal production in the week ended April 12, 1986, as estimated by the Energy Information Administration, totaled 17.52 million short tons (bituminous coal and lignite, 17.45 million short tons; Pennsylvania anthracite, .07 million short tons). This was 15.0 percent higher than the previous week, and was 3.2 percent lower than production in the corresponding week of 1985.

Cumulative U.S. coal production from January 1 through April 12, 1986, was estimated at 248.03 million short tons, 0.3 percent below the 248.81 million short tons produced in the comparable period in 1985.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).
